

### Stand Assembly and Shelf fitting (optional product when supplied)

Please note the stand is hand made from WBP plywood and veneer shades may vary. The pack will contain the base, top and 4 x bolts screwed in to the base. The base is heavy for stability purposes so take care when assembling.

**1)** Lay the top upside down on the floor and remove the 4 bolts from the base and keep handy.

**2)** Place the base **inside** the metal brackets with the bolt holes lining up with the bracket holes.

**3)** Screw in the 4 bolts and then turn the assembly over ready for use.

**The shelf** (not suitable for compact) is designed to hook over the bowl – locate and push the Brackets under the rear of the bowl lip to secure. Clean with a damp cloth..
