Discus Potters Wheels

Discus Wheels

Discus is probably the most powerful, compact portable potter's wheel in the world. Manufactured in the UK Discus is designed around reliable and durable technology. An extremely powerful motor delivers full torque at all speeds. The main unit measures only 160mm high and is easily moved and stored. An intelligent electronic controller and the constant torque motor provide the means for the Discus to throw higher loads of clay than its horsepower or size suggests.

The Versatile Discus

The Craftsman motor can be reversed at the flick of a switch - a feature greatly appreciated by left-handed potters.

The unit is totally independent and will sit securely without fixing on any work surface.

When not in use, the units are easy to carry and store, freeing valuable space in a kitchen, craft studio or classroom for other artwork and projects.

Discus is designed to be virtually maintenance free.

Engineered for Durability

The main housing is injection moulded in ABS plastic with inserts for strength and rigidity.

A special low voltage plug/socket arrangement for the motor eliminates the risk of incorrect connections.

Warranties

Every Discus wheel carries a full 2 year parts and labour guarantee. Conditions apply.

Powerful, robust, compact and portable

Product Range

Discus Standard

Powered by a 1/4 hp advanced electric motor.

Single direction cast 250mm aluminium wheel head with centering rings and fitted with the Discus bat retaining system which can accommodate oversize bats of 280mm and 305mm.

Supplied with speed control foot pedal and advanced electronic torque control unit designed to deliver full torque at all speeds.

The wheel centres 12kgs (25lbs) clay. Speed range 0 to 250 rpm.

Fully portable weight approx. 12kgs

Discus Craftsman

Similar to the Standard but fitted with a more powerful 1/3 hp advanced electric motor.

Forward-reverse control (appreciated by left handed potters)

Centres 16kgs (35lbs) clay. Range 0 to 300 rpm.

Fully portable weight approx. 12.5kgs

Discus Compact and Compact 'Plus'

Designed for use without a bowl and supplied with a remote electronic foot pedal.

Features a single direction 10" cast aluminium wheel head with centering rings fitted with the Discus bat retaining system.

Available separately are split bowls enabling the wheel head to be encased when required.

Supplied complete with carrying handle.

Fully portable, weight approx. 11kgs
